## COLLA TOPICIDA

---

● *SUMMARY*                      **RAT-KILLING ADHESIVE**

---

● *DESCRIPTION*                      Elastic substances plastified between them.

● *CHARACTERISTICS*                      Special elastic product, sticky and transparent, keeping its features in the time. It is absolutely non-toxic, not poisonous, unflammable, odourless, colourless, unalterable by the atmospheric agents. This special adhesive finds an useful and practical application into the fight against mouses, rats and pests.

● *APPLICATION*                      – This product has to be smeared onto the various supports or where the rats or pests are present and where they are captured when passing across  
– it's used for civil, agricultural and zootechnic disinfestations (buildings, warehouses, deposits, rearings, fruit-farms, trees, etc.) and everywhere is not possible to use poisons  
– as protection of the trees the product is applied as a ring all around so to stop the pests and rats  
– possible stainings have to be taken off by means of gasoline

● *PACKING*                              Tube of 135 g

● *PACKAGE*                              Thermofilmed packages of 25 tubes

● *STORAGE*                              Shelf life: about 3 years if stored in well closed original packings in a dry and airy place.  
Keep from freezing and extreme heat.
